

PLAY YOUR ROLE IN SOCIAL ENTREPRENEURSHIP

“INSPIRE- Innovative Serious Play for Identifying your Role in a Social Entrepreneurship” project is aiming to INSPIRE and empower young people to engage with Social Entrepreneurship, create teams, establish their own social startups through an innovative toolkit and a serious game.

OUR GUIDES

After 8 months of hard work and dedication, the Methodological Guide of INSPIRE project has already been published. This guiding document not only sets the main framework of the project, but it provides young entrepreneurs and youth trainers with interesting information regarding the initiation of a social start-up.

The guide includes experiences, approaches, tools and research from the partners of the project's consortium, which illustrate the landscape of social entrepreneurship in Europe (particularly in Cyprus, Greece and Spain) through data, successful case studies and up-to-date available mechanisms.

By the first quarter of 2021, we will be releasing our two Learning Training Guides, the first one on career development psychometric methods, and the second one on viable business models for Social Enterprises addressing challenges based on SDGs and the use of Social Media. These two guides provide the reader with an exhaustive framework and tools, on the two topics, in order to launch their social initiative.

SOME HIGHLIGHTS FROM THE METHODOLOGICAL GUIDE

Before setting up a social start-up, there are several things which need to be considered, such as the national landscape on social economy. The Methodological guide will help you identifying them!
